P.O. BOX 99
JOSEPHINE, TX 75164**

CITY OF JOSEPHINE

MAY 2025 NEWSLETTER

FUTURE EVENTS

Board of Adjustment Meeting is May 12th @ 5:30 p.m.
City Council is May 12th @ 6 p.m.
Planning and Zoning is May 15th @ 6 p.m.
Movie in the Park is May 16th @ 8:30 p.m.
City Hall is closed for Memorial Day May 26th
Fireworks in the Park is June 28th @ 4 p.m.

Josephine YouTube Channel

All video recordings of all city meetings will be uploaded to our YouTube channel. City meetings will be livestreamed, they will remain available for public access. This ensures that all residents have the opportunity to stay updated on city discussions and decisions at their convenience.

YouTube Channel is @CityofJosephine

PAGE 01

JOSEPHINE POLICE DEPARTMENT

- We are excited to announce that Officer Waters has joined the Josephine Police Department Team.
- Josephine Chief of Police attended The Texas Police Chief's Association Conference
- Sgt. Lainer joined the Hunt County Children's Advocacy Center, Bikers Against Child Abuse and CASA for Hunt County at Child Abuse Awareness Month Event.

**JOIN
NOW**

The Josephine Police Department is currently accepting applications for a full-time officer position. Certified officers who are looking to be part of a community-oriented police department with a friendly working atmosphere, as well as work in a small but growing rural community, are encouraged to complete a Personal History Statement.

JOSEPHINE PUBLIC WORKS DEPARTMENT

- We're thrilled to announce that new street signs have been installed throughout nearly all of city limits! 🚧🌟 This update will improve visibility and enhance the overall look of our streets.
- The splash pad is scheduled to open Memorial Weekend! Josephine's splash pad hours are from 8 a.m. - 9 p.m. (weather permitting). To activate features just wave your hand over the green sensor on the green pole.
- Construction is underway at both Sewer Plants to enhance our city's services.

**JOSEPHINE POLICE DEPARTMENT
NATIONAL POLICE WEEK**

MOVIE NIGHT

FRIDAY | **8:30 PM**
MAY 16, 2025

@ JOSEPHINE CITY PARK
221 MAIN ST. JOSEPHINE, TX 75173

**FREE HOT DOGS & POPCORN PROVIDED BY
JOSEPHINE POLICE DEPARTMENT AND
VOLUNTEER FIRE DEPARTMENT.**

WE WILL BE SHOWING MONSTERS, INC.

GRAND OPENING COMMUNITY CENTER

THANK YOU TO EVERYONE
WHO ATTENDED! ❤️

GENERAL INFORMATION FUTURE PUBLIC SAFETY BUILDING

LOCATION: 120 W. COOK ST.

EXPECTED COMPLETION: FALL 2025

**THE PUBLIC SAFETY BUILDING IS REALLY COMING TOGETHER!
CHECK OUT THIS PHOTO FROM APRIL—IT'S AMAZING TO SEE HOW
MUCH PROGRESS HAS BEEN MADE. THE BUILDING IS STARTING TO TAKE
SHAPE AND WILL BE AN IMPORTANT SPOT FOR KEEPING OUR
COMMUNITY SAFE AND SUPPORTED.**

GENERAL INFORMATION

EMPLOYEE SPOTLIGHT KYLE CLAY

Meet Kyle Clay, a dedicated Water Operator who has proudly served the City of Josephine for nearly four years. Kyle's journey into public works came after gaining hands-on experience in a variety of fields—including irrigation, roofing and construction, and private security. This diverse background gave him a strong foundation for the essential work he does today.

When he's off the clock, you can find Kyle enjoying the great outdoors fishing, watching The Dallas Stars 🏒, cooking up something delicious, or spending quality time with his family. Kyle calls Josephine home and says, "I love the people of this town and have been very blessed to not only be able to serve this community but also gain amazing leadership and guidance from its employees and supervisors."

CITY OF JOSEPHINE JOB POSTING

We encourage you to visit the City of Josephine's Human Resources page for current job postings. Even if there are no current openings you may sign up to receive notifications for future job opportunities. Stay informed and be ready for the next opportunity to join our team!

GENERAL INFORMATION

Josephine's City Planner Miguel Inclan

Miguel proudly serves as the City of Josephine's first City Planner and brings extensive academic and professional experience to our growing community. His career began at City of Laredo in 2011, with a brief stint at the City of Bulverde in the Texas Hill Country. Prior to joining Josephine, he served for nearly 5 years in the City of Corinth where he contributed to generational projects that have shaped an impressive public transformation.

Miguel's holds bachelor degrees in Public Service (The University of Texas at Brownsville) and Urban Planning (Arizona State University), a Master of Science in Water Resource Policy and Management (East Central University), and a Master of Public Affairs (The University of Texas at Dallas). He also holds graduate certificates in Non-Profit Management and Public Budgeting and Financial Management (both from The University of Texas at Dallas) and Basic Code Enforcement Certification.

Miguel is a member of the American Institute of Certified Planners, the American Planning Association, and an accredited member of the Congress for the New Urbanism. An active Shriner, Miguel is passionate about the Shriners' philanthropic mission to provide care for children suffering burns or orthopedic conditions.

With honor and pride to serve in this important new role for the City of Josephine, he looks forward to guiding the city's development with a focus on ensuring that our residents live in a city that is greener (more trees/enhanced landscaping), better connected, healthier, and happier.

2024 Consumer Confidence Report for Public Water System

The City of Josephine's 2024 CCR Report is now available! 💧

You can view the report on our city website under the Public Works Department. This report includes detailed results from our 2024 water quality testing and highlights the continued excellence of our Superior Water System.

2024 Consumer Confidence Report for Public Water System CITY OF JOSEPHINE

This is your water quality report for January 1 to December 31, 2024

For more information regarding this report contact:

CITY OF JOSEPHINE provides surface water from **North Texas Municipal Water District (TX0430044 North), Wylie treatment plant. It comes from Lake Lavon.**

Name City of Josephine

Phone 972-843-8282

Este reporte incluye información importante sobre el agua para tomar. Para asistencia en español, favor de llamar al telefono (972) 843-8282.

Definitions and Abbreviations

Definitions and Abbreviations

The following tables contain scientific terms and measures, some of which may require explanation.

Action Level:

The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Avg: Regulatory compliance with some MCLs are based on running annual average of monthly samples.

Level 1 Assessment:

A Level 1 assessment is a study of the water system to identify potential problems and determine (if possible) why total coliform bacteria have been found in our water system.

Level 2 Assessment:

A Level 2 assessment is a very detailed study of the water system to identify potential problems and determine (if possible) why an E. coli MCL violation has occurred and/or why total coliform bacteria have been found in our water system on multiple occasions.

Maximum Contaminant Level or MCL:

The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal or MCLG:

The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum residual disinfectant level or MRDL:

The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Maximum residual disinfectant level goal or MRDLG:

The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

MFL

million fibers per liter (a measure of asbestos)

mrem:

millirems per year (a measure of radiation absorbed by the body)

na:

not applicable.

NTU

nephelometric turbidity units (a measure of turbidity)

pCi/L

picocuries per liter (a measure of radioactivity)

Definitions and Abbreviations

ppb:	micrograms per liter or parts per billion
ppm:	milligrams per liter or parts per million
ppq	parts per quadrillion, or picograms per liter (pg/L)
ppt	parts per trillion, or nanograms per liter (ng/L)
Treatment Technique or TT:	A required process intended to reduce the level of a contaminant in drinking water.

Information about your Drinking Water

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline at (800) 426-4791.

Contaminants that may be present in source water include:

- Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.
- Radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. FDA regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Contaminants may be found in drinking water that may cause taste, color, or odor problems. These types of problems are not necessarily causes for health concerns. For more information on taste, odor, or color of drinking water, please contact the system's business office.

You may be more vulnerable than the general population to certain microbial contaminants, such as *Cryptosporidium*, in drinking water. Infants, some elderly, or immunocompromised persons such as those undergoing chemotherapy for cancer; persons who have undergone organ transplants; those who are undergoing treatment with steroids; and people with HIV/AIDS or other immune system disorders, can be particularly at risk from infections. You should seek advice about drinking water from your physician or health care providers. Additional guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* are available from the Safe Drinking Water Hotline (800-426-4791).

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. We are responsible for providing high quality drinking water, but we cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

Information about Source Water

CITY OF JOSEPHINE purchases water from NORTH TEXAS MWD WYLIE WTP. NORTH TEXAS MWD WYLIE WTP provides purchase surface water **North Texas Municipal Water District (TX0430044 North), Wylie treatment plant. It comes from Lake Lavon..**
[insert a table containing any contaminant that was detected in the provider’s water for this calendar year, unless that contaminant has been separately monitored in your water system (i.e. TTHM, HAA5, Lead and Copper, Coliforms)].

TCEQ completed a Source Water Susceptibility for all drinking water systems that own their sources. This report describes the susceptibility and types of constituents that may come into contact with the drinking water source based on human activities and natural conditions. The system(s) from which we purchase our water received the assessment report. For more information on source water assessments and protection efforts at our system contact **Garrett Jackson at (972) 843-8282..**

Lead and Copper	Date Sampled	MCLG	Action Level (AL)	90th Percentile	# Sites Over AL	Units	Violation	Likely Source of Contamination
Copper	2024	1.3	1.3	1.01	0	ppm	N	Erosion of natural deposits; Leaching from wood preservatives; Corrosion of household plumbing systems.
Lead	2024	0	15	0.757	0	ppb	N	Corrosion of household plumbing systems; Erosion of natural deposits.

2024 Water Quality Test Results

Disinfection By-Products	Collection Date	Highest Level Detected	Range of Individual Samples	MCLG	MCL	Units	Violation	Likely Source of Contamination
--------------------------	-----------------	------------------------	-----------------------------	------	-----	-------	-----------	--------------------------------

Haloacetic Acids (HAA5)	2024	25	15.4 - 39.2	No goal for the total	60	ppb	N	By-product of drinking water disinfection.
--------------------------------	------	----	-------------	-----------------------	----	-----	---	--

*The value in the Highest Level or Average Detected column is the highest average of all HAA5 sample results collected at a location over a year

Total Trihalomethanes (TTHM)	2024	38	32.7 - 42	No goal for the total	80	ppb	N	By-product of drinking water disinfection.
-------------------------------------	------	----	-----------	-----------------------	----	-----	---	--

*The value in the Highest Level or Average Detected column is the highest average of all TTHM sample results collected at a location over a year

Inorganic Contaminants	Collection Date	Highest Level Detected	Range of Individual Samples	MCLG	MCL	Units	Violation	Likely Source of Contamination
Nitrate [measured as Nitrogen]	2024	1	0.603 - 0.603	10	10	ppm	N	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits.

Disinfectant Residual

A blank disinfectant residual table has been added to the CCR template, you will need to add data to the fields. Your data can be taken off the Disinfectant Level Quarterly Operating Reports (DLQOR).

Disinfectant Residual	Year	Average Level	Range of Levels Detected	MRDL	MRDLG	Unit of Measure	Violation (Y/N)	Source in Drinking Water
Chloramines	2024	3.5	2.3-3.0	4	4	ppm	N	Water additive used to control microbes.

Violations

Lead and Copper Rule			
The Lead and Copper Rule protects public health by minimizing lead and copper levels in drinking water, primarily by reducing water corrosivity. Lead and copper enter drinking water mainly from corrosion of lead and copper containing plumbing materials.			
Violation Type	Violation Begin	Violation End	Violation Explanation
FOLLOW-UP OR ROUTINE TAP M/R (LCR)	10/01/2024	2024	We failed to test our drinking water for the contaminant and period indicated. Because of this failure, we cannot be sure of the quality of our drinking water during the period indicated.

The City of Josephine has completed the required service line inventory. There are no customer service lines containing Lead, Galvanized, or copper with lead solder that needs to be replaced. The lead and copper inventory report are available upon request.

Watering Guidelines

Effective April 1 to October 31

Sunday & Wednesday

Residential properties with **odd**-numbered addresses (ending in 1,3,5,7,9)

Tuesday & Saturday

Residential properties with **even**-numbered addresses (ending in 2,4,6,8)

Monday & Thursday

Non-residential properties (business/HOA common areas)

Friday

No residential or business watering unless exceptions apply

- ★ Landscape watering by automatic sprinklers is **prohibited between 10am and 6pm.**
- ★ Foundations and landscaping (shrubs, trees, etc.) may be watered for up to 2 hours **any day** by **hand-held hose or soaker hose only.**
- ★ Newly planted sod may be watered more than 2 times per week for up to 30 days, but no water runoff is permitted, and watering is prohibited between 10am and 6pm.
- ★ Adjust sprinklers to **avoid overwatering** and **excessive runoff.** Check your setting to make sure you are watering on your assigned day and in the cool of the morning or night.

Summer Water Conservation Starts with YOU!

Thank you for doing your part in
conserving water in North Texas.

Josephine
TEXAS

The background of the entire page is a dynamic, high-speed photograph of water splashing, creating intricate patterns of droplets and foam in various shades of blue and white.

MY WATER ADVISOR 2.0

MY WATER ADVISOR 2.0 EASILY ALLOWS YOU TO ACCESS YOUR ACCOUNT VIA A WEB-READY DEVICE (COMPUTER, LAPTOP, TABLET, OR SMARTPHONE APPLICATION) IN REALTIME WHILE PROVIDING THE FOLLOWING BENEFITS:

Create Monthly Budget

Conserve Water

Address high consumption during the month anytime

Be notified of leaks throughout the month to address them promptly

Vendor Information

- Application (the information that is required when submitting a payment)
- Payment of \$75 for a 10 x 10 spot
- You may also pay by cash, check or money order to reserve your spot

EVENT: JUNE 28TH @ 4PM

- Setup begins at 1:30pm - day of the event
- Setup must be completed by 3:00 pm
- If you will be selling any food products you must have a permit with Collin County (Collin County Temporary Event Permit)

**APPLICATION AND PAYMENT IS REQUIRED
TO SECURE YOUR VENDOR SPOT**

FIREWORKS IN THE PARK

SPONSORSHIP OPPORTUNITIES

FIREWORKS

\$5,000 - \$7,000

GENERAL FIREWORK SHOW AND FINALE ARE PLANNED FOR THE EVENT. MULTIPLE FIREWORKS SPONSORS ARE NEEDED.

LIVE BAND

\$3,000

LOCAL BAND THE RIDE WILL PLAY A VARIETY OF MUSIC THROUGH THE EVENT

CARNIVAL RIDES

\$4,000 - \$6,000

SEVERAL CARNIVAL RIDES ARE PLANNED FOR THE EVENT. MULTIPLE RIDE SPONSORS ARE NEEDED.

GENERAL

\$500

ALL GENERAL SPONSORS WILL ONLY RECEIVE MENTION ON THE CITY WEBSITE AND FACEBOOK PAGE

The City has traditionally funded this event, so all activities are free to the public except food purchases. The City is offering sponsorship opportunities to help cover costs for specific and general activities. If interested in sponsoring an activity, please call City Hall. Sponsored activities will have the sponsor's name or logo displayed on a sign next to the sponsored activity. An announcement will be made during the event naming and thanking all major sponsors for their support.
